DETAILED ACTION

Election/Restrictions

Claims 18-22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 4.

Applicant's election with traverse of Group I in Paper No. 4 is acknowledged. The traversal is on the ground(s) that the restriction requirement might later be shown to be misplaced. This is not found persuasive because applicant's response does not address reasons supporting an improper restriction requirement.

The requirement is still deemed proper and is therefore made FINAL.

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the subject matter in claim 13 cannot be found in the specification: 'means for providing', 'active comparison' and 'information'.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3711

Claims 6, 8-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Regarding claim 8, it is not clear how an article of clothing can be the affixing means. Regarding claims 9 and 10, applicant is claiming an apparatus and may not claim portions of a person's body. Regarding claim 11, the laser beam *provides* an alignment reference (claim 1), it is not clear how the reference is now defined as a laser beam. Regarding claim 12, applicant is attempting to claim the ground as part of the device. Regarding claim 13-17, it is not clear what applicant is attempting to claim. In particular the 'information' in claims 16 and 17 is not understood.

Claim 6 recites the limitation "the fastening means" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5, 6, and 13-15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Jehn (5,284,345). Referring to figure 1 Jehn discloses a training device comprising housing having a laser (item 1), an affixing means (col 2, line 58), a movable member (3) and a swivel member (col 2, lines 13-16). Regarding claims 5 and 6, Jehn discloses Velcro as the fastening means (col 58). Regarding claims 13-15, as

Art Unit: 3711

understood by the Examiner applicant is claiming a device with laser affixing means as shown by Jehn.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jehn in view of Cannone (4,406,040). Jehn discloses the invention as shown above but fails to disclose a clip as the fastening means. Cannone teaches a clip as the fastening means (fig 2-4). One skilled in the art would have modified the fastening means to provide a secure connection.

Allowable Subject Matter

Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
